ABOUT ME

iOS developer with an automation engineering background, now moving into full-stack web development. I ship apps on the App Store, build projects in React and Tailwind, and design automations and data pipelines with Python and n8n (API integration, PostgreSQL, Docker). Strong object-oriented foundations and comfortable working in Agile.

EXPERIENCE

Pier Program · Advanced Developer

Sep 2025 · Jun 2026

Apple Developer Academy @ UniNa · 2nd Year · Naples, Italy

- Selected for the Pier Program, reserved for the top students of the 2024/2025 standard class. Building iOS apps full-time for external clients (NGOs, university research departments, public-private organizations), managing the full cycle from requirements gathering to delivery.
- Accountable for delivery on real client projects: scoping under real constraints, communicating with stakeholders, and owning what gets shipped.

CNC Machine Operator

Jan 2016 · Jun 2018

Utensili Services Srl (school work placement) · San Vitaliano, Italy

- Operated precision CNC machinery during a school work placement — where attention to detail and hands-on problem-solving first became second nature, the same rigor I now bring to code.

EDUCATION

Bachelor's Degree in Automation Engineering | L-8

In progress

Università degli Studi di Napoli Federico II · Naples, Italy

- Relevant coursework: Artificial Intelligence with Python, Computer Networks, C/C++ programming, and Java fundamentals.

Apple Developer Academy

Sep 2024 · Jun 2025

Università degli Studi di Napoli Federico II · Naples, Italy

- 9-month full-time program at the largest Apple Developer Academy outside the US. Built production iOS apps end-to-end with Swift and SwiftUI, applied Human-Centered Design and Challenge-Based Learning in multidisciplinary teams, with apps shipped to the App Store.

PROJECTS

Automation & Data Pipelines · n8n

2026

n8n · Python · JavaScript · PostgreSQL · Docker · REST API

- Suite of workflows as solo developer: an AI Email Agent with *human-in-the-loop* (Gmail → AI classification → Discord approval → Notion), a scheduled ETL pipeline writing public-API data into a PostgreSQL database (Supabase), and an uptime monitor with Telegram alerts.

CowPow! Radio Stories

Sep 2025 · Jun 2026

Apple Developer Academy @ UniNa · Pier Program · Client: CHOC (Childhood Cancer Foundation, South Africa)

Unity (URP) · C# · SwiftUI · iOS

- Game developer in a 6-person team building a medical simulation app for children undergoing radiotherapy. Shipped to the App Store and released worldwide by the NGO; tested with children, doctors and social workers in South Africa.

LISionario · Italian Sign Language Dictionary

2025

SwiftUI · Airtable (REST API) · Cloudinary · async/await

- App built on a remote-services architecture: structured data in Airtable via REST API and media on the Cloudinary CDN, with an async compress→upload→record pipeline and a two-table moderation queue. 6-person team.

Alzheimer Classification · Machine Learning

2023 · 2024

Python · scikit-learn · Pandas · NumPy

- ML pipeline (Artificial Intelligence exam) classifying dementia status from longitudinal clinical data. Object-oriented architecture with 5 classes, benchmarking 9 classifiers with cross-validation; best ROC-AUC ~0.95.

SKILLS

WEB

React, Tailwind, HTML5, CSS, JavaScript

LANGUAGES

Python, Swift, C++, C, Java (basics), C#

DATABASES & APIS

PostgreSQL, Airtable, REST APIs

AUTOMATION & DEVOPS

n8n, Docker, Git, Agile/Scrum

IOS

SwiftUI, SpriteKit, SwiftData, AVFoundation

METHODS & TOOLS

Jira, Confluence, Xcode, Figma, OOP

LANGUAGES & PROFILES

Italian native speaker

English fluent (written and spoken)
